

ENVIRONMENTAL POLICY

The environmental policy of I.B.S. Refreshment and Plastics Industry SA confirms its commitment to actively participate in the global effort for healthy environment for people and the planet.

So, I.B.S is committed to:

- operate in compliance with applicable legislation on environmental issues
- continuously improve its environmental performance through an effective Environmental Management System, which has been assessed as conforming with ISO14001:2015. Starting from 2023, the company annually prepares a comprehensive ESG report, counting its environmental footprint and setting improvement targets
- continuously improve its energy efficiency, through advanced technological means (new equipment, renovation of existing equipment) and improved working practices that contribute to less energy consumption
- consider water as a precious natural resource and strive to minimize consumption and make efficient use in processes.
- use safe recyclable and post recycled materials whenever possible
- reduce operational waste through advanced equipment and improved processes and manage waste following the principles of circular economy
- develop an effective recording system that supports the effort to reduce its carbon footprint
- enhance the active involvement of all its staff in its environmental objectives
- cooperate wherever possible with companies that have developed an Environmental Management System
- participate in sectoral dialogue with the public and the public authorities for the development of best practices.

I.B.S Environmental Policy is publicly available and reviewed in the light of technological developments and environmental audit results.

Responsibility for the implementation of this Policy lies with the most senior executives responsible for the company.
